

Name _____ Date _____

1) $\frac{4}{5} + \frac{7}{20} =$

2) $\frac{8}{23} + \frac{18}{23} =$

3) $\frac{3}{29} + \frac{5}{29} =$

4) $\frac{4}{18} + \frac{4}{18} =$

5) $\frac{1}{4} + \frac{2}{7} =$

6) $\frac{1}{7} + \frac{1}{3} =$

7) $\frac{3}{5} + \frac{11}{25} =$

8) $\frac{5}{18} + \frac{15}{18} =$

9) $\frac{15}{16} + \frac{1}{2} =$

10) $\frac{9}{14} + \frac{3}{4} =$

Answer Key

$$1) \quad \frac{4}{5} + \frac{7}{20} = \frac{16}{20} + \frac{7}{20} = \frac{23}{20} = 1 \frac{3}{20}$$

$$2) \quad \frac{8}{23} + \frac{18}{23} = \frac{26}{23} = 1 \frac{3}{23}$$

$$3) \quad \frac{3}{29} + \frac{5}{29} = \frac{8}{29}$$

$$4) \quad \frac{4}{18} + \frac{4}{18} = \frac{8}{18} = \frac{4}{9}$$

$$5) \quad \frac{1}{4} + \frac{2}{7} = \frac{7}{28} + \frac{8}{28} = \frac{15}{28}$$

$$6) \quad \frac{1}{7} + \frac{1}{3} = \frac{3}{21} + \frac{7}{21} = \frac{10}{21}$$

$$7) \quad \frac{3}{5} + \frac{11}{25} = \frac{15}{25} + \frac{11}{25} = \frac{26}{25} = 1 \frac{1}{25}$$

$$8) \quad \frac{5}{18} + \frac{15}{18} = \frac{20}{18} = \frac{10}{9} = 1 \frac{1}{9}$$

$$9) \quad \frac{15}{16} + \frac{1}{2} = \frac{15}{16} + \frac{8}{16} = \frac{23}{16} = 1 \frac{7}{16}$$

$$10) \quad \frac{9}{14} + \frac{3}{4} = \frac{18}{28} + \frac{21}{28} = \frac{39}{28} = 1 \frac{11}{28}$$
